INTRO

Hello! I'm Claudio from Brazil. I never imagined myself filming weddings until I fell in love and decided to marry Bruna.

I got married during the pandemic, and like many couples at the time, I didn't have a wedding film. Over the years, I realized I didn't miss the big staged moments or perfectly composed scenes. What I missed were the voices, the reactions, the hugs, the laughter, and the way the people we love experienced that day with us.

That feeling is what led me to weddings. Today, I don't try to create moments or turn the day into a production. I prefer to observe. To be present without taking space. While you live your wedding, I focus on what naturally unfolds: the glances, the emotions, the connections between you, your family, and your friends. Often, it's in the reactions that I find the real story.

Every wedding has its own rhythm and personality, and I believe the film should reflect that. Some are intimate and quiet, others are full of energy and movement. My work is to listen, observe, and shape a film that allows you to remember not only what happened, but most importantly, how it felt.

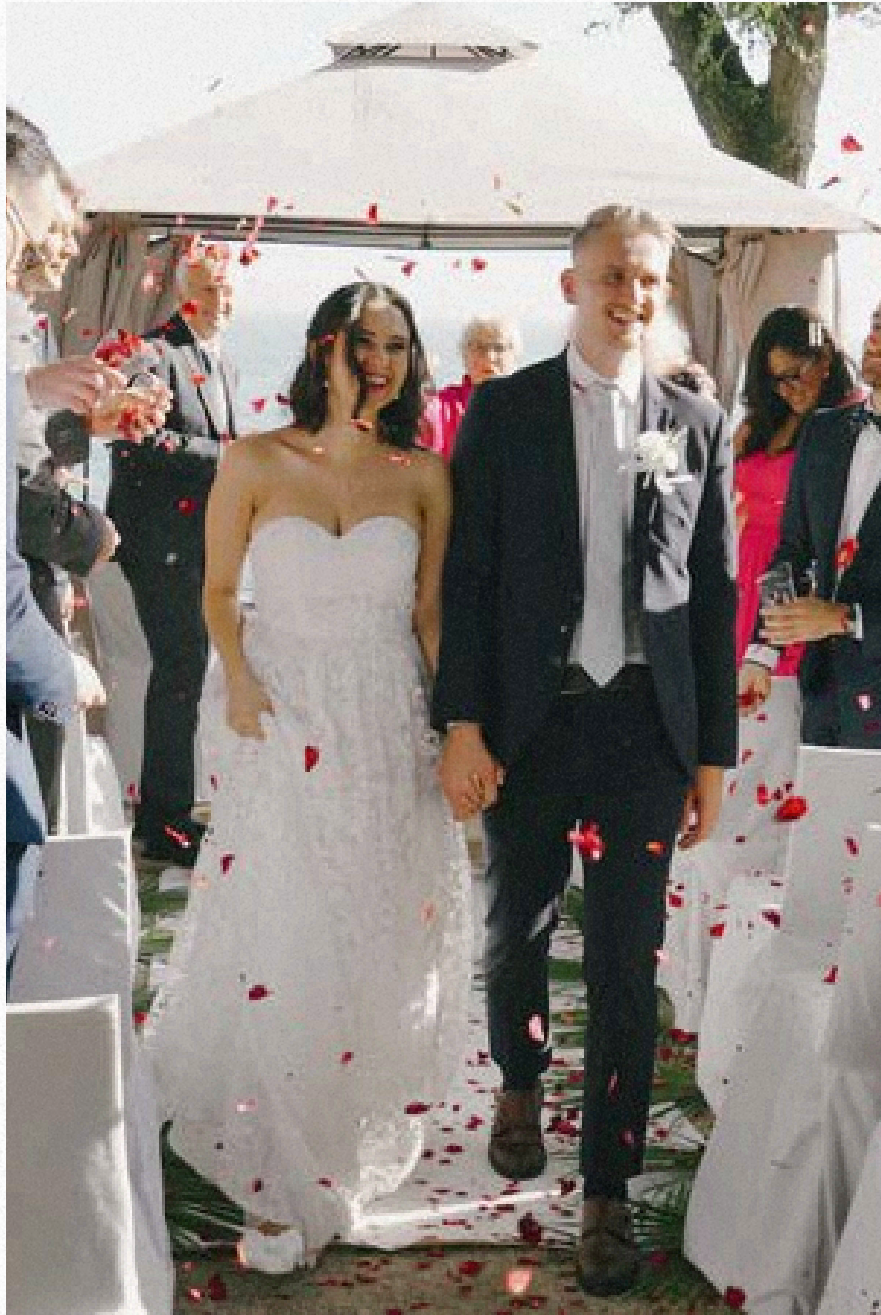

CCfilms was created to preserve the memories of your wedding day.

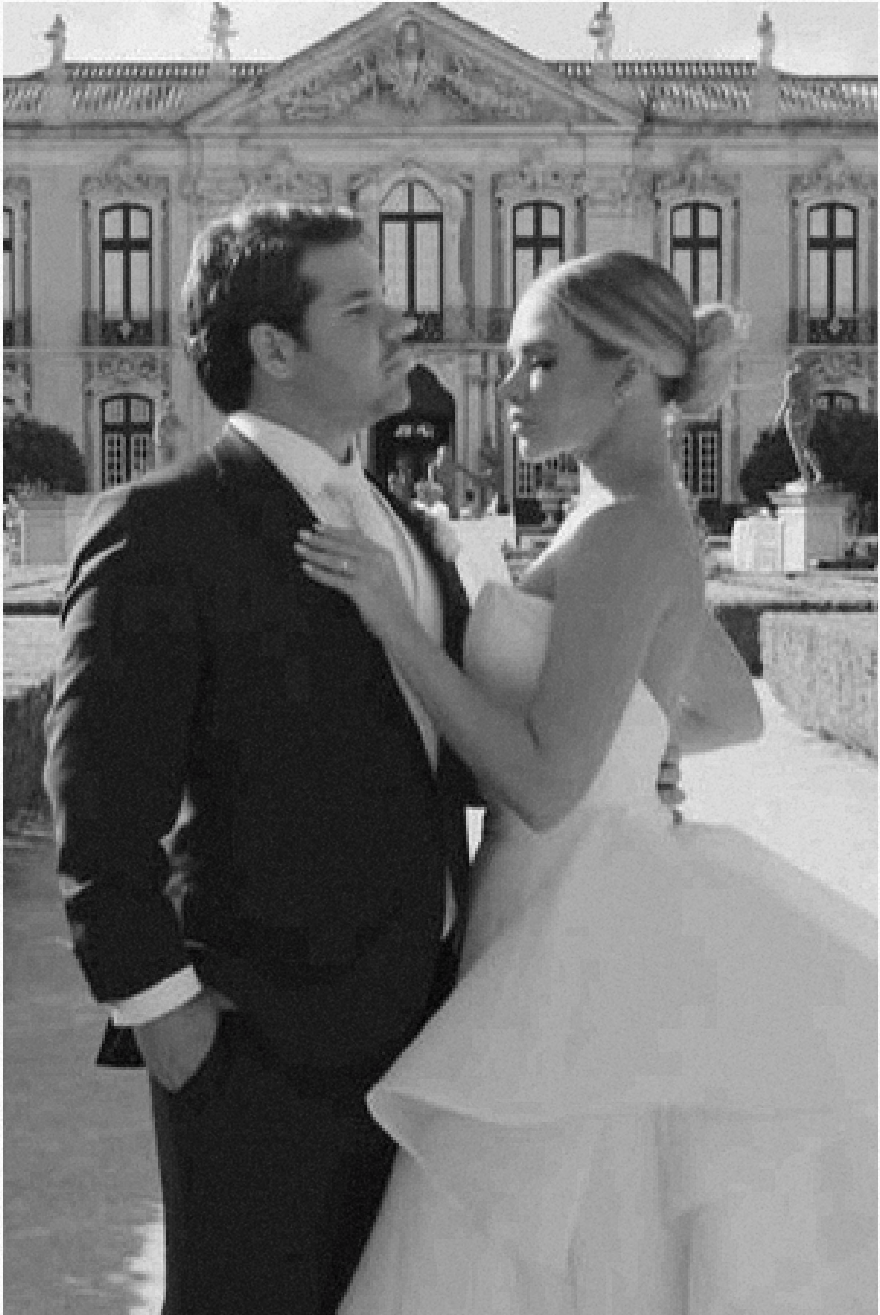

Love between couples, the emotions within families, and the invisible bonds that hold everyone together on a **wedding day**.
